

JAVA Lab
Lab Experiment No 7

Roll No.____ Batch_____

Aim: Write a JAVA program to implement the concept of Package

Problem statement:

Create a class, "Amount_In_Words" within a user defined package, "credit" to convert the amount into words. (Consider the amount not to be more than 100000).

Detailed description:

1. Package, credit contains : displayAmount()
2. Class, Amount_In_Words contains: getAmount(), it will take amount to be credited

displayAmount () overridden to display the amount
in words

Theory:

1. What is a package?
2. Why and when to use packages?
3. Explain types of packages and how to use them?

Program: code

Output: Snapshot of output (please take output with minimum two possible input
